---

## CAREER OBJECTIVE

Full-stack developer with 1+ year of experience in designing and implementing web applications across backend and frontend layers. Experienced in REST API development, real-time communication systems, and database-driven applications. Looking to contribute technical expertise to build scalable and efficient systems.

---

## RESPONSIBILITIES

- Contributed to the design and development of scalable RESTful APIs using Node.js, Express.js, and Spring Boot for enterprise and product-based applications.
  - Implemented JWT-based authentication and authorization to secure user login and protected endpoints.
  - Developed frontend components using React.js and integrated them with backend services.
  - Responsible for building and integrating real-time communication features using WebSockets, Kafka, and Redis for live updates and system notifications
  - Configured and managed database connections, schema design, and query optimization using PostgreSQL, MySQL, and MongoDB.
  - Performed API testing and validation using Postman to ensure reliable request-response handling and error management.
  - Configured application-level settings, including CORS handling, environment variables, and structured logging (GCP/server logs) for debugging and monitoring.
  - Used Git for version control, including branch creation, pull/push operations, merging, and collaborative code management.
- 

## EXPERIENCE

### Vijay Software Solutions Pvt. Ltd

*Java Developer | Aug 2025–Mar 2026*

#### ExamProMax – Online Learning & Examination Platform

- Contributed to backend development of a scalable online learning and examination system.
- Implemented APIs for Super Admin and Admin management, including organization creation and configuration.
- Developed exam workflow modules supporting scheduling, candidate management, and automated result processing.
- Built real-time functionalities using WebSockets and Redis for live chat and exam status updates.
- Performed API testing, debugging, and version control using Postman and Git.

**Tech Stack:** Node.js, Express.js, PostgreSQL, Redis, WebSockets, REST APIs, JWT

---

### Anasol Consultancy Services Pvt. Ltd

*Associate Software Engineer Intern | Feb 2025 – Jul 2025*

#### TechLife HRM – Employee Management System

- Developed backend modules for employee onboarding, role management, and secure data access.
- Designed and implemented RESTful APIs using Spring Boot and MySQL.
- Built a real-time ticketing system using Apache Kafka and Redis Pub/Sub for ticket updates and notifications.
- Ensured data consistency, security, and backend performance optimization.
- Performed backend debugging and API testing using Postman and Git

**Tech Stack:** Java, Spring Boot, MySQL, Kafka, Redis, REST APIs, JWT

## PROJECTS

### Solid Brand—Full Stack E-Commerce Platform

React, Node.js, Express.js, MongoDB, JWT, Razorpay

- Developed an end-to-end e-commerce web application with secure JWT-based authentication and role-based access (admin/user).
- Implemented email OTP-based login authentication for enhanced security.
- Built RESTful APIs using Node.js & Express.js for product management, cart, and order processing.
- Integrated Razorpay payment gateway for secure online transactions.
- Designed a responsive frontend using React.js and optimized backend performance.

### Manvi Vastra – Online Saree Shopping Platform

React, Node.js, Express.js, MongoDB

- Developed a full-stack e-commerce platform for online saree shopping.
- Implemented product catalog management, cart functionality, and order processing modules.
- Designed RESTful APIs and managed MongoDB database integration.
- Built responsive UI components using React.js for seamless user experience.

### TutorGo Application

React, Tailwind CSS, Spring Boot, PostgreSQL, Razorpay API

- Developed a location-based tutor discovery and booking platform with subscription plans.
- Implemented geolocation search, tutor filtering, and secure payment integration.
- Designed REST APIs for user management, tutor onboarding, and bookings.

### Fake Job Classification System (ML) | Dec 2024 – Feb 2025

Python, FastAPI, BiLSTM (Keras), HTML, CSS, JavaScript

**Publication:** *IJMECE*, 2025 | [https://www.ijmece.com/ijmeceadmin/upload/ijlbps\\_68448b41af6a6.pdf](https://www.ijmece.com/ijmeceadmin/upload/ijlbps_68448b41af6a6.pdf)

- Built a BiLSTM-based NLP model to classify job postings as real or fake.
- Integrated the model with FastAPI to serve predictions via REST APIs.

---

## TECHNICAL SKILLS

- **Backend Technologies:** Node.js, Spring Boot
- **Frontend Technologies:** HTML, CSS, JavaScript, React.js
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Messaging & Real-Time:** Apache Kafka, Redis, WebSockets
- **Tools & Cloud:** Git, Postman, Gcp
- **Languages:** Java, Python, C

---

## EDUCATION

### B.Tech – Information Technology

Bhoj Reddy Engineering College for Women | CGPA: 7.1 | 2021–2025

Intermediate (TSBIE) | 84.4% | 2019–202

Class X (SSC) | GPA: 9.5 | 2019

---

## ACHIEVEMENTS

- Runner-Up, COWE Fempreneur Season 3 – Business Idea Competition (2023)
- Runner-Up, COWE Fempreneur Season 4 – Business Idea Competition (2024)

---

## CERTIFICATIONS

- **Machine Learning Internship** – Verzeo
- **Cloud Computing Internship** – Acmegrade
